

Training Workstations

The ULTIMATE in Training 'Aftercare'

On completing training, retaining newly learned skills is the next challenge.

With many new technologies not requiring frequent technical intervention, technicians can go for months without applying their new skills.

To obtain maximum benefits from a training investment, there are several ways to complement class training.

One of the most effective ways to reinforce classroom training is through the provision of an opportunity to practice safely using a Training Workstation.

What is a Training Workstation?

- A simulator of an installed system which allows practice/reinforcement of skills acquired in the classroom
- A tool to ensure new skills are practiced and reinforced following classroom training
- A platform for testing modules and spare parts before using them in plant or returning them for repair
- A tool for evaluating modifications to engineering processes – reducing development time and achieving shorter, more effective start-ups
- Rockwell Automation offers a range of standard workstations or customised designs for specific applications

PLC-5 Training Workstations

The PLC-5 training workstation including I/O simulator panel, pre-wired swing arms, I/O modules and 240V ac power supply is priced at **£5,500**. The same training workstation built without processor, I/O modules or power supply is priced at **£3,150**.

Prices for PLC Training Workstations fitted with I/O modules, power supply and your selected processor are as follows:

Processor	DH+ /RIO only	ControlNet	Ethernet
PLC-5/20	L20B £7,671	L20C15 £7,750	L20E £8,265
PLC-5/40	L40B £9,394	L40C15 £9,473	L40E £9,888
PLC-5/80	L20B £11,266	L20C15 £11,345	L20E £11,859

SLC-500 Training Workstations

The SLC-500 training workstation including I/O simulator panel & PanelView monitor, pre-wired SLC-500 system and 240V ac power lead is priced at **£3,650**.

Prices for SLC-500 Training Workstations fitted with your selected processor are as follows:

Processor	8K	16K	32K	64K
SLC-5/03	£3,927	£4,067	–	–
SLC-5/04	–	£4,227	£4,364	£4,637
SLC-5/05	–	£4,629	£4,766	£5,038

ControlLogix Training Workstations

The ControlLogix Training Workstation including diagnostic digital I/O, isolated analogue I/O and appropriate simulation. Motion control options include servo amplifier and motor. The SERCOS motion control option is also available.

Prices for ControlLogix workstations are as follows:

Catalogue Number	Description	Price
DTR-SIM-CLX-11	13 slot chassis, 2 controllers, Ethernet, ControlNet, DeviceNet & DH+/RIO Communication cards. No motion control	£7,450
DTR-SIM-CLXGMC-12	10 slot chassis, 2 controllers, ControlNet & DH+/RIO Communications. Two axis motion controller with 1 servo amplifier and 1 motor	£8,800
DTR-SIM-CLXGMC-13	10 slot chassis, 2 controllers, ControlNet & DH+/RIO Communications. Two axis motion controller with 2 servo amplifiers and 2 motors	£9,950
DTR-SIM-CLXGMC-12SE	Same as DTR-SIM-CLXGMC-12 but using SERCOS motion control	£9,500
DTR-SIM-CLXGMC-13SE	Same as DTR-SIM-CLXGMC-13 but using SERCOS motion control	£10,650

Heavy Duty Case

Lightweight Case

All training workstations can be supplied with either a lightweight or heavy duty transport case – contact the training Centre for information and pricing details.

To receive more information on Training Workstations, contact the Training Centre on **0870 600 8080** or faxback on **0121 355 0315**
