

Automation University Special - Manchester 20th April 2010

	Room 1 (60)	Room 2 (60)	Room 3 (60)	Room 4 (20)	Room 5 (30)	
08:15						08:15
09:00	Welcome & Keynote Presentation					09:00
09:15	Using Software Tools to create and exploit operation intelligence MN101	Integrated Architecture - Core system benefits MN201	Water Forum Vision for Automation in the Water industry MN401	Integrating safety with GuardLogix and Ethernet/IP safety devices MN303	Manufacturing / IT Convergence - The next generation Ethernet switch MN302	09:15
10:00			IT & Automation Convergence in Water Applications MN402			10:00
10:30	Coffee Break					10:30
10:45	Effective Asset Management through the use of remote monitoring techniques and capabilities MN102	Process Automation Solutions - Intelligent instruments integration and plant asset management MN202	Improved efficiencies through your intelligent automation assets MN403	Continued: Integrating safety with GuardLogix and Ethernet/IP safety devices MN303	Continued: Manufacturing / IT Convergence - The next generation Ethernet switch MN302	10:45
12:00	Lunch					12:00
13:00	Practical strategies to improve your Energy Management MN103	Pavilion Technology – Model Predictive Control MN203	Data Rich & Information Poor ? - Improved information management in water applications MN404	Connected Components Solutions - Optimised to meet your needs for simple and smart machine control MN301	Integrated Architecture - The Power of One: End User and OEM lab fundamentals MN304	13:00
14:00		Manufacturing/IT Convergence - What does it mean for my operation? MN204	How to gain remote access to your site automation assets in a secure way MN405			14:00
15:00	Coffee Break					15:00
15:15	Intelligent Motor Control strategies to improve operational performance MN104	Using Motion Control Solutions to make efficiency gains MN205	How to exploit data from Field Devices in today's water utility MN406	Continued: Connected Components Solutions - Optimised to meet your needs for simple and smart machine control MN301	Continued: Integrated Architecture - The Power of One: End User and OEM lab fundamentals MN304	15:15
15:45			Safety Solutions to assist with implementation of ISO 13849-1 MN206			Planning for a sustainable future in water . MN407
16:15		Strategic Maintenance in Water - Matching your activities to your assets needs MN408				16:15
17:15	Close					17:15

Presentation	Demonstration	Hands-on Workshop
